SUMMARY

Data Analyst with **3+ years** of experience translating complex business and operational data into clear, actionable insights that drive decisions. Proven track record delivering BI dashboards, automated reporting workflows, and predictive analytics across healthcare, operations, and provider network environments. Skilled in **SQL, Python, Power BI, Tableau, Excel, and PySpark** - with strong business acumen, stakeholder communication, and a focus on turning data into measurable business outcomes.

EXPERIENCE

Data Analyst | Community Dreams Foundation | Remote Nov 2025 – Present

- Led development efforts within a 4-person analytics team to design and deliver end-to-end ETL pipelines on Databricks, reducing data processing time from **3–5 days to near real-time** and improving data accuracy by **30%** through automated validation - enabling faster, more reliable reporting for business stakeholders.
- Engineered centralized data models and Power BI dashboards adopted by **5–10 stakeholders across 2 teams**, replacing manual reporting cycles and delivering same-day business intelligence visibility to decision-makers.
- Accelerated reporting cycle times by automating data pipeline testing workflows, cutting delivery by **~1 week per iteration (25% faster)** - enabling the analytics team to surface insights to business stakeholders significantly faster.
- Architected an automated regulatory data pipeline ingesting **100–500+ monthly records** via REST API, auto-classifying records by risk tier and reducing manual data review effort by **30%** through real-time automated alerting.

Data Analyst | Seattle Pacific University, operated by Sodexo | Seattle, WA Oct 2023 – June 2025

- Designed and delivered interactive Power BI dashboards used daily by **2 operations managers** to track peak-hour demand, staffing utilization, and product movement - enabling data-backed staffing and inventory decisions that contributed to a **5% increase** in customer satisfaction scores.
- Streamlined daily sales and inventory reporting by building automated SQL and Excel workflows, saving **4–6 hours per week** of analyst time and enabling self-serve data access for operations managers across **2 locations**.

Data Analyst | Bharath Home Medicare Pvt Ltd | Chennai, India May 2022 – Aug 2023

- Developed executive dashboards tracking **\$6M+** in annual contract value and revenue segmentation across a 5,000+ provider, 1,300+ location network - directly informing board-level strategy that sustained a **97.5% client retention rate** and average contract span of 4+ years.
- Analyzed operational data across **100,000+ records** to identify that a single business unit represented **72% of total revenue** - insight that drove strategic resource reallocation and resulted in onboarding **206 new service locations**.
- Supported the business development pipeline through data analysis that contributed to securing **88 new corporate clients** - including a **\$2.1M contract** across 16 sites - while maintaining a 97.5% retention rate across the existing client base.

SKILLS

Analytics & BI: SQL · Power BI · Tableau · Looker Studio · Plotly Dash · Flourish Studio · Excel (MOS Certified, 925/1000)

Programming: Python · R · PySpark · Pandas · Scikit-Learn

Cloud & Data Engineering: GCP · BigQuery · Databricks · AWS S3 · MySQL · Azure Blob · ETL Pipelines · REST APIs

Machine Learning: Random Forest · Gradient Boosting · Neural Networks · K-Means · ROC Analysis

Business Skills: Stakeholder Reporting · Requirements Gathering · Process Automation · KPI Development · Data Storytelling

PROJECTS

Pharmaceutical Sales Strategy & Regulatory Analytics | Power BI · DAX · Star Schema · Excel | [GitHub](#)

Built an end-to-end Power BI solution analyzing global pharmaceutical sales across **10+ countries**, architecting a normalized Star Schema with advanced DAX measures (SUMX, DATEADD, DIVIDE) - uncovering that FDA/EMA-compliant drugs drive **78% of stable revenue** while non-compliant drugs show **40% higher revenue volatility**, directly quantifying the ROI of faster regulatory submissions.

Absenteeism Prediction & HR Analytics Dashboard | Python · Random Forest · Scikit-Learn · Power BI | [GitHub](#)

Developed an end-to-end HR analytics pipeline combining a Random Forest model (**84% accuracy**) with a 4-page interactive Power BI dashboard - identifying BMI, absence reason, and transportation expense as the top 3 absenteeism predictors, and surfacing **Winter and March** as peak risk periods to support proactive staffing and wellness program decisions.

EDUCATION

Master of Science in Data Analytics for Business · Seattle Pacific University, Seattle WA

Sep 2023 – Aug 2025

Bachelor of Design – Interior Design · SRM Institute of Science and Technology, Chennai, India

June 2018 – May 2022
